

UNFOLD

DARK STORY

Solutions

WARNING:

Do not read before playing the games!

SOLUTION

03

If you put together skeleton keys number 5,8,4 and 2, you will get the key you need to unlock the door.

5842

SOLUTION

05

The lock combination is the number of the current day of the week and the numbers of the 3 previous days. Since today is Wednesday, and there are 7 days of the week, today's code is 3217.

SOLUTION

07

The plant in the packet is lavender. The numbers assigned to the parts of the plant and placed in the same order that they are mentioned in the notes, give you the code 657.

SOLUTION 08

To push the box to the door you need to perform the following commands in the following order:

SOLUTION 11

A patient who suffers from epileptic seizures and weighs 185 pounds needs 2,74 g of the drug, while a healthy patient needs 10% more (3,01 g). The coffee will weaken the drug by another 10%, so you need to stir in 3,31 g of the drug. The tablet weighs 10 g, which means you need 33% of the drug.

SOLUTION 12

If you look at the keys from the end side you will see the digits of the code. The order of the digits is the order of the keys on the key ring.

0312

SOLUTION 17

If you shine a light at the silhouette of the building so that it casts a shadow at the courtyard and match the cross marks, you will see the digits of the code in the shadows overlapping the flower beds in the courtyard.
